

# iPhone lesson plan for beginners

Build knowledge and skills as you learn about your iPhone. Work through the lessons in the checklist at your own pace and tick each one off as you go to track your progress.

## Lesson 1: iPhone interactive tour and setup

- iPhone interactive guide** Discover phone features through interactive examples and information cards.
- iOS icon glossary** Download the visual glossary for Apple mobile devices to learn what each icon means.
- Resetting your pre-owned iPhone** Prepare a used iPhone for your personal use.
- Setting up your new iPhone** Set up a passcode, adjust settings and customise your new iPhone.
- Basic gestures and navigation** Build your tapping, swiping, scrolling and zooming skills.
- iPhone system settings** Set the date and time, change your ringtone, and manage alerts on your iPhone.

## Lesson 2: The basics of using your iPhone

- Using the Home button on an iPhone** Quickly access the main apps and features on your device.
- Using the Side button on an iPhone** Access handy controls with the press of a button.
- Checking for software updates on an iPhone** Look for and install software updates on your device.
- Closing unused apps on an iPhone** Find open apps on your phone and close them.
- Closing unused websites on an iPhone** Find open websites on your phone and close them.
- Using portrait and landscape modes on an iPhone** Control the orientation of your phone's screen.

## Lesson 3: Calls, privacy and settings

- iPhone: Accessibility settings** Increase text size, use voice-to-text, and more.
- iPhone: Quick settings** Add shortcuts, adjust brightness, sounds, wireless connections, and more.
- How to block a number on an iPhone** Learn how to block nuisance callers on your iPhone.
- iPhone: Calls and privacy** Block nuisance callers and keep your number private.

## Lesson 4: Using the camera and managing your photos

- Apple iPhone: Using the camera** Capture, edit and share your photos with friends.
- Managing and storing your photos** Store and manage photos across your devices and the cloud.
- How to scan a QR code with an iPhone** Use your phone's camera to safely scan a QR code.
- Apple iPhone: Cloud backup and photo sharing** Learn how to share and back-up photos.

### Lesson 5: Security and online safety

- iPhone: Security and privacy** Customise your phone to help keep your information secure.
- Managing passwords** Learn how password managers can securely manage your online accounts.
- Protecting your privacy online** Discover eight ways to protect your privacy online.

### Lesson 6: Video calling and using social media

- Getting set up for video calling** Before you make a video call, find out everything you need to get set up.
- How to use FaceTime** Learn to use Facetime on your Apple device to call loved ones here and overseas.
- Introduction to social media** Understand popular social media platforms and why people use them.
- Avoiding common scams** Protect yourself from online scams and tricks while using the internet.

### Lesson 7: Apps and cloud services

- Useful apps** Explore apps that you can use throughout the day to make life more convenient.
- What is the cloud?** Find out what the cloud is and how it can store and back-up your photos and files.
- Apple iCloud apps** Discover the benefits and inclusions of an Apple iCloud subscription.
