All you need to know about data and public Wi-Fi

Want to learn about managing your data and using public Wi-Fi? Join our free live streamed presentation for older Australians, hosted by the eSafety Commissioner.

Whether you are using the internet at home or on your mobile when you are out and about, everything you do online uses data. Knowing how and when to use your mobile data or Wi-Fi connection can help you stay safer online and save money.

Join our presentation to learn how to:

- get the best value for money from your mobile data plan
- manage your data allowance
- keep your data costs down while out and about
- use public Wi-Fi safely.
